

AMAZON WORKSPACES

ACCESS YOUR DESKTOP ANYWHERE, ANYTIME, USING ANY SUPPORTED DEVICE

Amazon WorkSpaces is a fully managed, secure Desktop-as-a-Service (DaaS) solution which runs in the Amazon Cloud. Provide your users and partners with a high-secure, virtual Microsoft Windows desktop that grants them access to the documents, applications and resources they need, anywhere, anytime, from any supported device.

With no upfront cost, you pay either monthly or hourly just for the Amazon WorkSpaces you launch. This helps you save money when compared to traditional desktops and on-premise Virtual Desktop Infrastructure (VDI) solutions.

BENEFITS OF USING AMAZON WORKSPACES

- Simple and fast deployment
- No long-term commitments

- Pay-as-you-go, per month or per hour
